

A New Environmental Education Resource & Community-Building Tool is Here!

Cameron, L. 2013. *Circlebee: A book about Circle & bees*. Canada: Bumblebee Circle Publishing.

"This book is for *bumbling builders* learning how to *bee* in a time of ecological crisis & uncertainty. It is a book about Circle and a tribute to bees. If you are interested in Circle practice or beekeeping, or work in the field of community-building, the environment, or education - this book is for you!"

Circle + bee = Circlebee

***Circlebee* is a way of seeing the Circle process and all that it entails through the world of bees.** Author, Laura Cameron - - an *environmental educator, Circle facilitator, community-builder, beekeeper, and foodscape gardener* living in British Columbia - draws from her knowledge and experience of bees & beekeeping to describe what is meant by the Circle process, and what makes it **an exceptional community-building and Environmental Education tool!**

This unique hands on resource makes clear the **building blocks of Circle** (process, skills & values), and lists **essential Circlekeeping skills** so that we can all keep Circles of our own in everyday living - and teach it to others. *Circlebee* is a useful instrument for anyone looking to enhance communication skills, collaboration and well-being within a group setting - be it at work, in the classroom, at community functions, governance meetings and so forth.

"Coming to know honeybees more intimately as an amateur beekeeper has had a profound impact on the way I now understand Circle. I have found that beekeeping and Circlekeeping educe a way of being and being together that embodies courage, heart, gentleness, mindfulness, generosity, and gratitude. Coming to know Circle in this bee-aautiful way has filled me with the greatest hope that YES! it is possible to heal the relationships we humans have with the earth and all its beings through this transformative process."
